This section details the properties of the Water Access Licence.

This is the volume of water (ML) you have **available for use for the remainder of the water year.**

This figure (ML) is the sum of the Standard & Drought columns which equals your total account balance.

This section details all transactions associated with your Water Access Licence.

This is the volume of water (ML) currently **unavailable for use** as announced by DNR. This water will be made available once resource availability improves.
