

## GWYDIR WATER DELIVERIES

06 February 2009

Gwydir Valley customers are reminded that irrigation releases from Copeton Dam will finish on Monday 16 February 2009.

It is anticipated that irrigation releases will not recommence until Copeton has received sufficient volume to replenish the delivery loss account.

Customers are advised to allow additional lead time when placing orders to facilitate grouping of orders to maximise efficiency of delivery. All orders must be placed by **Monday 9 February 2009. The survey responses we have received will not be used as water orders.**

All customers and landholders are advised to ensure that they have plans in place to fulfil their own stock and domestic requirements over the coming months.

State Water will continue to monitor water resources and weather conditions.

For further information regarding water delivery please contact:  
Allan Robertson 6752 3728.
